

## Use Case of Cyber Security EPP & EDR for Compliance

Mahindra Pratap, the CISO of ACB (Associated Commercial Bank), was reminiscing the Cyber Security initiatives that his team was running in ACB. One of the things they were proud of, was implementing an EPP & EDR solution.

CMS IT Services was ACB's implementation partner. And their team had introduced this solution as an umbrella solution to meet a lot of business & regulatory requirements. Talk about killing a few birds with one stone. After all the EPP & EDR solution not just provided endpoint protection, incident response, threat hunting, and other services, it also helped ACB comply with PCI DSS and HIPAA, the RBI (Reserve Bank of India) mandated standards for the banking industry.

CMS IT demonstrated how EPP & EDR solution could gather crucial data to demonstrate an organization's proactive measures in protecting their systems from potential attacks. This solution comprehensively addressed ACB's security concerns.

***This is a real life use case. Names have been protected.***
